

Fall Protection Safety Systems

Capital Safety knows that while on the job you need comfort, mobility and safety. They've designed each component of their safety systems to be fully customizable, ready to fit any size or shape. And because every safety system provides flexibility and full mobility, they make it easier to keep working productively while remaining fully protected.

With over 25 years of fall protection expertise, Capital Safety offers the broadest line of safety equipment in the industry: harnesses, shock absorbing lanyards, self-retracting lifelines, rescue and retrieval equipment, netting, and more. They engineer all safety systems to meet (and exceed) every code.

Capital Safety also has a complete line of specialty items to address unique safety concerns and provide safety solutions for challenging environments. For example, flame-resistant Kevlar® webbing harnesses and lanyards assure safety when working around flame and excessive heat. Nonsparking and nonconductive hardware offers the protection you need while working in explosive environments or when electrical conductivity is an issue.

With their total safety systems approach, Capital Safety takes fall protection to a new level. And to make sure you have total protection, each one of their five basic systems typically contains four safety components: body support, connecting component, anchorage connector and anchorage.

Full Body Harness Sizing Chart

One size fits most - approximately mediumUniversal
90 - 130 lb.X-Small
130 - 170 lb.Small
170 - 240 lb.Medium
240 - 300 lb.Large
300 - 340 lb.X-Large
340 - 390 lb.XX-Large
390 - 420 lb.3X-Large

A person's height may also affect sizing choices.

Full Body Harnesses

First™ Harness

FIRST full body harnesses provide fundamental fall protection with exceptional value.

Features:

- Adjustable dorsal D-ring for proper fit
- 1.75" wide polyester web
- Minimum tensile strength: > 5,000 lb.
- Zinc-plated stamped steel

Delta™ Vest-Style Harness

New, improved Delta harnesses combine “industry-first” advancements with popular features that have made Delta the workhorse of the industry. Today’s Delta represents more than twenty years of design, research, manufacturing know-how and on-the-job performance.

Features:

- Lanyard keepers hold your unused snap hooks and help reduce trip hazards
- Revolver™ vertical torso adjuster eliminates loose ends and locks into place preventing slippage
- Repel™ webbing is water repellent to reduce attraction of mold and dirt and has up to five times more abrasion resistance
- Delta™ comfort hip pad is constructed with a soft, breathable interior that’s more comfortable and supports your back and hips better while you’re carrying a heavy load
- Spring loaded, stand-up dorsal D-ring automatically stands-up ensuring fast, easy and safe connections to your fall arrest system
- Delta No-Tangle™ design creates a frame that allows the harness to fall into place when donned
- Built-in, impact rip-stitch indicators allow you to inspect the harness at a glance for prior damaging impact loads
- 420 lb. capacity
- I-Safe™ Velcro® cover protects harness labels and holds DBI-SALA’s i-Safe identification tag, giving you an efficient way of recording and storing information on inspections

PRO™ Vest-Style Harness

Introducing the all new, fully functional Protecta PRO™ harnesses. With designs that incorporate improved fit, updated colors, and durable yet lightweight construction, Protecta PRO™ harnesses provide greater comfort and added safety—which translates to reduced worker fatigue and increased productivity.

All PRO™ Harnesses feature:

- 420 lb. capacity
- Lanyard keepers hold your unused snap hooks and help reduce trip hazards
- Built-in, impact rip-stitch indicators allow you to inspect the harness, at a glance, for prior damaging impact loads
- Spring loaded, stand-up dorsal D-ring automatically stands-up ensuring fast, easy and safe connections to your fall arrest system
- Lightweight hardware reduces weight and fatigue
- Body belt and hip pad provide added lumbar support, positioning capabilities and tool carrying options

Lanyards

ShockWave™2 Shock Absorbing Lanyard

ShockWave2 lanyards are designed to expand to 6 ft. and contract to 4½ ft. in reaction to your movements, reducing trip fall hazards, dragging and snagging. In case of a fall, the inner core immediately begins to extend and absorb energy, limiting arresting forces to 900 lb. or less.

Item #	Code	Description	Stock*
1224306	DBI	6' Single Leg Lanyard w/Snap Hooks	Y
1224321	DBI	6' Single Leg Lanyard w/Snap Hook & Steel Rebar Hook	Y

Rain Gear

frog toggs® Rain Gear

This protective outerwear is 100% waterproof, 100% windproof and breathable. Rain Toggs are constructed with a patented process of three layers of polypropylene material with a center layer of micro-porous film. Because the pores are 20,000 times smaller than a water droplet, moisture cannot penetrate yet the fabric will still breathe. Also, the patented seaming process eliminates needle holes and possible water entry. The full cut of these suits allows them to fit easily over work clothes and weighs less than one pound.

Head & Face Protection

V-Gard® Hard Hat

V-Gard protective caps and hats from MSA consist of a polyethylene shell and suspension system working together as a protection system. V-Gard headwear features advanced styling in either cap or hat styles, offering comfortable protection.

V-Gard caps and hats meet or exceed the applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-2009, Class E, and also as outlined in CSA Z94.1-2005 (Class E) with 1-Touch and Fas-Trac suspensions.

Fas-Trac Suspension

MSA officially-licensed NFL* and Nascar V-Gard helmets can be specially ordered. Other logos available too.

**NFL Properties, the NFL, and its Member Clubs make no express or implied claims with respect to the effectiveness and safety of these products and have not manufactured or endorsed these products in any way.*

Defender™ Faceshield Frame

Without Visor

Designed to fit any of MSA's protective caps or hats. When properly positioned, they will securely hold faceshields, visors and welding shields.

Defender™ Headgear Faceshield Frame

Without Visor

MSA's Defender Headgear Faceshield Assembly consists of a lightweight, flexible headband that adjusts to accommodate head sizes 6½ to 8. The assembly provides limited impact protection to the eyes, face, and front of the head, but is not unbreakable. It must be used with approved spectacles or goggles and additional safety equipment as required. Avoid areas where the chance of severe lens impact exists.

V-Gard® Visor

Made of durable polycarbonate. Helps protect wearers from flying debris, splash or spray.

- 8 x 15½" x .040

Do not mix suspension and helmet sizes. Make sure the sizes match (example: standard-size suspension with standard-size helmet). Use only MSA suspensions on an MSA helmet. Failure to comply with the above will reduce the energy-absorbing ability of the protective helmet, which can result in serious injury or death.

Fire Extinguishers

Know your ABCs of Fire Safety

466142K

21006204

Kidde ABC Dry Chemical Fire Extinguisher

These dry chemical extinguishers use a nontoxic monoammonium phosphate agent that effectively fights Class ABC fires.

Disposable Extinguisher - Model 466142K

lightweight, easy-to-use extinguishers are the perfect answer for areas that need supplemental protection. Extinguishers have seamless aluminum cylinders so they won't leak.

Service Lite Extinguisher - Model 21006204

Single-use extinguishers are dependable and able to do the job when an emergency arises.

Pro Line™ Extinguisher - Model 466204/466206

Pro Line extinguishers are designed to meet most industrial and commercial applications. Extinguishers feature metal valves, seamless aluminum and steel cylinders, and chip-resistant paint. The handle and lever are made of pressed, heavy-gauge metal for added strength.

Safety Cans

Type I Safety Can for Gasoline, Kerosene & Diesel

Eagle Type I safety cans meet OSHA and NFPA Code 309 requirements and are FM, UL and ULC approved for safe handling and storage of gasoline and other flammable liquids.

- 2-piece, no-weld construction
- No top or side seams
- Nonsparking brass pour spout and flame arrestor
- Spring-closing lid with neoprene gasket that relieves internal pressure at 5 psi
- Lead free - constructed of 24-gauge hot dipped galvanized steel
- Includes an F-15 HDPE funnel, making filling and dispensing easier
- Red/gasoline, Blue/kerosene, Yellow/diesel

Item #	Code	Description	Stock*

Safety Storage Cabinets

Small Storage Cabinet

These cabinets are available in single door manual or self-closing. Ideal for flammables, these cabinets can be used on counter tops, workbenches or on the floor.

Standard Size Cabinet

The standard sized cabinets are available in two-door manual, two-door sliding, and two-door self-closing. These floor model cabinets are designed for storage of larger containers of flammable liquids.

These items are nonstock, but readily available by special order.

Padlocks

Master Lock.

No. 1 Padlock

Commercial grade padlock features superior protection from drilling and prying.

- 1 3/4" wide laminated steel body for superior strength
- 1 5/16" tall, 3/16" diameter hardened steel shackle for extra cut resistance
- 4-pin cylinder helps prevent picking
- Dual locking levers provide extra pry resistance

No. 5 Padlocks

Commercial grade padlock features superior protection from drilling and prying.

- 2" wide laminated steel body for superior strength
- 1" tall, 3/8" diameter hardened boron alloy shackle for superior cut resistance
- 4-pin cylinder helps prevent picking
- Dual locking levers provide extra pry resistance

No. 7 Padlocks

- 1 1/8" wide laminated steel body for superior strength
- 9/16" tall, 3/16" diameter standard steel shackle
- 4-pin cylinder helps prevent picking
- Dual locking levers provide extra pry resistance

Multi-Gas Monitors

Ventis™ MX4 4-Gas Monitor

The Ventis MX4 allows you to select your sensor configuration to meet your monitoring needs at any time. Select one of four configurations to measure from one to four of the following gases: combustible gases/methane, O2, CO, H2S, NO2, SO2.

Additional features:

- Broad sensor measuring ranges provide the ability to see changes in hazardous conditions beyond normal monitoring ranges
- Interchangeable lithium-ion and alkaline battery packs
- PEAK reading storage provides quick access to an on-screen review of highest exposure conditions
- On-board continuous data logging: storage of a minimum of three months of sensor data allows for routine review of gas exposures, revealing areas of safety concern and potential improvement
- Audible, visual and vibrating alarms 95 dB audible, ultra bright visual and strong vibration alarms
- Programmable bump test mode
- Calibration overdue alarm prompts user and prevents normal use if instrument has not been calibrated
- Short-term and time-weighted average exposure measurements and alarms
- Quick-Cal calibration mode allows all sensors to be calibrated simultaneously using one cylinder of blended calibration gas
